

About the job

Project Description:

Applying to the position, you may join one of the most respected and fastest growing institutional investors in the world. Our client is a professional investment management organization that globally invests the funds to ensure long-term sustainability. The company invests in all major asset classes, including public equity, private equity, real estate, infrastructure and fixed-income instruments, and currently has offices in Toronto, London, Hong Kong, New York, São Paulo, Luxembourg and Mumbai.

Client attracts and selects high-caliber individuals from top-tier institutions around the globe. Join our team and look forward to:

- Diverse and inspiring colleagues and approachable leaders
- Stimulating work in a fast-paced, intellectually challenging environment
- Accelerated exposure and responsibility
- Global career development opportunities
- Being motivated every day by important social purpose and unshakable principles
- A deeply rooted culture of Integrity, Partnership and High Performance

If you share a passion for performance, value a collegial and collaborative culture, and approach everything with the highest integrity, here's an opportunity.

Responsibilities:

- Manage timelines/deliverables within the team towards the successful delivery of projects.
- Design software solutions by interacting with portfolio managers, traders, operations staff and peers to understand requirements.
- Develop solutions that are in line with client's technology biases, deliver efficiency and scalability, and enable new trading activities.
- Provide knowledge transfer to team members and support staff through application demos, walkthroughs, and documentation.

Mandatory Skills Description:

- Experience in Python in an enterprise environment, covering the whole development life cycle
- Must have good communication skills, strong client-facing skills and able to manage client's expectations
- Strong technical skills with AWS technologies such as Lambda, SNS, SQS, S3
- Strong technical skills with Terraform

- Experience with production-level programming

Prioritization in needed skills:

- Python and AWS - 5
- Terraform - 4
- GitHub Actions - 3

Nice-to-Have Skills Description:

- Capital Markets domain experience

Languages:

- English: C1 Advanced
